

Portfolio

Nadine Medhat

AI & Machine Learning Beginner

About Me:

"My passion for data analysis and developing intelligent models has led me to explore the world of machine learning. In this portfolio, I share some of the projects I have worked on, reflecting my growth in this field. My goal is to continue learning and building solutions that transform data into smart decisions."

Education:

- I am a third-year student at the Faculty of Computers and Artificial Intelligence, Beni-Suef University.
- I have completed an AI course from ITI.
- I participated in the "Rowad Masr" initiative by AMIT.

Skills and Expertise

1

Programming Languages
(Python,SQL)

2

Problem Solving

3

Data Analysis (Excel)

Technical Skills

Soft Skills

4

Flexibility

5

Teamwork

6

Communication Skills

Projects:

1. Computer Graphics Project

Technologies Used: C++

Project Description: Developed 3D and 2D shapes using C++ graphics libraries. The project focused on understanding fundamental computer graphics concepts such as geometric transformations, rendering, and object visualization.

2. Software Engineering Project – Library Management System

Technologies Used: UML, Requirement Analysis.

Project Description: Designed and analyzed a Library Management System, creating Class Diagrams and Use Case Diagrams. Conducted a thorough requirement analysis and documented system specifications professionally.

3. Database Project – Hospital Management System

Technologies Used: SQL, Microsoft SQL Server

Project Description: Designed and implemented a hospital database using SQL. The project involved ,creating tables, defining relationships, writing queries and ensuring data integrity to support hospital .operations efficiently

Additionally, I am about to start working on a comprehensive Machine Learning project, which will further develop my practical experience and technical skills.

Always eager to learn and grow in the world of AI and data!

**Thank you for visiting, and I hope
you find inspiration in my work!**
